Photo Place Holders

When working on Websites, Project Stylings or Prototypes in order to reduce development time, team can generate dynamic place holder images by modifying the URL. It helps rapid development process.

In order to use dummy Place Holder images in Websites and Web Applications , please replace {variables} in the following link and use the final link in "src" attribute:
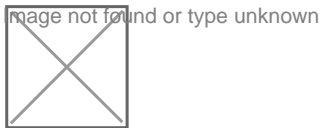

Simple Image

```
https: //placehold. co/{width}x{height}
```

Example link

https://placehold.co/1920x1080

Example Implementation:
